PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer with 2+ years of hands-on experience building and deploying production-ready web applications, intelligent bots, and AI-powered tools. Proven ability to take ownership of entire product lifecycles — from architecture and development through deployment and iteration. Passionate about reliability, security, and delivering real business value through clean, scalable code.

TECHNICAL SKILLS

Languages: Python, JavaScript, HTML, CSS, SQL
Backend: Flask, SQLAlchemy, REST API Design, Authentication Systems (OTP, JWT, PIN-based)
Frontend: Jinja2, Bootstrap, Responsive UI Integration
Database: MySQL, Database Design, Query Optimization
AI & APIs: OpenAI API, Wolfram Alpha API, Hugging Face, Telegram Bot API
Dev & Tools: Git, GitHub, Linux, Deployment & Hosting, Automation Workflows
Practices: Anti-fraud Logic, Payment Integration, Admin Dashboards, Scalable Architecture

KEY PROJECTS

CBT Exam Platform — JAMB, WAEC & Post-UTME Simulator 2023 – Present

Stack: Flask • SQLAlchemy • MySQL • Payment Integration • Email OTP

- ▶ Built and deployed a full-scale exam simulation platform with thousands of active users.
- ▶ Implemented OTP-based email verification and payment-gated PIN access for secure user onboarding.
- ▶ Designed a scalable question bank system supporting multiple exam types (JAMB, WAEC, Post-UTME).
- ▶ Developed a comprehensive admin dashboard for managing users, questions, payments, and access control.
- ▶ Engineered robust authentication and session management to ensure exam integrity and security.

AdrenaAI — Conversational AI Assistant 2024

Stack: OpenAI API • Python • NLP • API Integration

- ▶ Developed a custom AI assistant leveraging the OpenAI API for intelligent, context-aware conversations.
- ▶ Integrated Wolfram Alpha and Hugging Face APIs for enhanced mathematical and NLP capabilities.
- ▶ Designed the system with extensibility in mind, allowing easy addition of new AI capabilities.

Telegram Bots Suite — Automation & Anti-Fraud Systems 2023 – Present

Stack: Python • Telegram Bot API • Anti-Fraud Logic • Workflow Automation

- ▶ Built multiple feature-rich Telegram bots handling user management, commands, and automated workflows.
- ▶ Implemented advanced anti-fraud detection logic to identify and block suspicious activity in real time.
- ▶ Integrated third-party APIs to extend bot functionality with data lookups, AI responses, and notifications.

General Web Development — Business & Client Websites

2023 – Present

Stack: Flask · HTML · CSS · JavaScript · MySQL

- ▶ Designed and built responsive, production-ready websites for various use cases and clients.
- ▶ Handled full-stack development independently — UI design, backend logic, database, and deployment.

EXPERIENCE

Freelance Full-Stack Developer

2023 – Present

Self-Employed · Remote / Nigeria

- ▶ Designed, built, and deployed multiple production web applications independently from scratch.
- ▶ Collaborated with clients to translate business requirements into reliable, user-friendly software.
- ▶ Managed entire project lifecycles: requirements gathering → design → development → deployment → maintenance.
- ▶ Consistently delivered secure, scalable systems with emphasis on reliability and user experience.

EDUCATION

Olabisi Onabanjo University

2024 – Present

Bachelor of Medicine & Bachelor of Surgery (MBBS) · Undergraduate

- ▶ Concurrently studying Medicine and Surgery while actively building and shipping real-world software products.
- ▶ Self-directed study in coding, programming, and cybersecurity alongside the medical curriculum.
- ▶ Demonstrates strong time management, discipline, and the ability to operate across highly demanding domains simultaneously.

WHAT I BRING TO YOUR TEAM

- ✓ End-to-end ownership: idea → design → code → deploy
- ✓ Fast delivery without sacrificing code quality
- ✓ Security-first mindset: auth, anti-fraud, data protection
- ✓ Strong communication and ability to work independently
- ✓ Production experience with real users and real stakes
- ✓ Adaptable and eager to learn new technologies quickly
- ✓ Rare blend of medical and technical thinking — analytical, precise, human-centered
